

Not every mobile device supports all features of our smart phone App. A device's operating system and capabilities affect the overall user experience. This document lists device capabilities that deliver the best user experience with our mobile solutions.

DEVICES/FEATURES THAT DELIVER THE BEST PERFORMANCE

>	Operating System — iOS (10.0+) or AndroidOS (version 4.2+)
>	Camera Specs — Rear-facing, auto focus, 5+ megapixel resolution (for mobile RDC) <i>Note: devices without a rear-facing camera will not support mobile RDC functionality</i>
>	Connectivity — 4G LTE/Wi-Fi
>	Display Resolution — 1024x768+
>	Location Services — GPS enabled/native mapping app enabled <i>Note: devices without location services or native mapping applications will not allow you to search for Branch/ATM locations.</i>

DEVICES/FEATURES THAT DELIVER MINIMUM PERFORMANCE

>	Operating System — iOS (version 9.0+) or AndroidOS (version 4.2+)
>	Camera Specs — Rear-facing, auto focus, 1.9+ megapixel resolution (for mobile RDC) <i>Note: devices without a rear-facing camera will not support mobile RDC functionality</i>
>	Connectivity — 3G/Wi-Fi
>	Display Resolution — 800x480+ pixels
>	Location Services — Native mapping app access allowed <i>Note: devices without location services or native mapping applications will not allow you to search for Branch/ATM locations.</i>

Note: AndroidOS v2.3 has limited capabilities with our mobile app. For better performance, either update your device to a more certain release or utilize our browser based mobile

DEVICES/FEATURES THAT DO NOT SUPPORT OUR APPS

>	Features that do not meet the minimum qualifications above
>	Operating System — iOS (versions < 9.0) or AndroidOS (version <4.2), Windows, Blackberry®, Kindle Fire
>	Camera — <1.9 megapixels
